

SAS Data sets for Q1 to Q4: WORK.Retail_sales

Q1. Using the 'PROC EXPORT' to export the SAS data 'WORK.Retail_sales' into a CSV file 'retail_sales.csv' saved in a folder in the file system. (Note do not export headers i.e. the first row) in the process.

Q2. Applying the 'EXPORT WIZARD' in SAS environment to export the data set 'WORK.Retail_sales' into a pipeline ('|') delimited file 'retail_sales' saved into a folder. Also generating the export SAS codes and saved as a SAS program file 'export_retail.sas'.

Q3. Using 'PROC IMPORT' and 'IMPORT WIZARD' separately to import the CSV file generated in Q1 into the WORK library. The resulting data sets are named as 'retail_sales_1' and 'retail_sales_2' respectively. (Note there is no header in this CSV file).

Q4. Using the 'PROC IMPORT' and 'IMPORT WIZARD' separately to import the pipeline ('|') delimited file generated in Q2 into the WORK library. The resulting SAS data sets are named as 'retail_sales_3' and 'retail_sales_4' respectively.
